Care and Maintenance

- Satin Brass and Polished Brass Trims can be left to age (oxidise) for a natural finish. However to keep the brass like new these two finishes will need to be polished from time to time with a propriety brass polish. Ensure that you follow the instructions on the tin and protect your flooring during polishing.
- Satin Nickel, Chrome, and Brushed Chrome These finishes will need to be polished from time to time with a propriety metal polish. Ensure that you follow the instructions on the tin and protect your flooring during polishing.
- Pewter, Antique Bronze and Antique Brass If these finishes become contaminated the only option is to polish them with a propriety metal polish and allow them to age again naturally. Ensure that you follow the instructions on the tin and protect your flooring during polishing.
